Most of my experience over the last 10 years was working with web development, graphic design (digital and print) and marketing campaigns. I got a vast experience with design softwares and CMS platforms such as Wordpress (Woocommerce included), Joomla and I also made a project using Magento in the past. I'm always trying to learn new tools and technologies. I've created a considerable number of web sites and landing pages during my career, both as freelancer and as employee.

OBJECTIVE

I seek personal and professional growth and an opportunity to work with graphic design and web, mainly creating web sites in a place where I can apply all my skills. I consider myself hard worker and very capable professional as I can ally my design knowledge with my web development experience.
